Geometric definitions

-1-

► calculate-subvolume-offsets:

- subvolume grÖÙe wird als konstant angenommen

► calculate-subprojection-borders:

- subvolume grÖÙe wird als konstant angenommen

$$\bullet \text{ top} = -\frac{1}{2} N_z \cdot d_z + n \frac{1}{N_V} \cdot N_z \cdot d_z$$

$$\bullet \text{ bottom} = -\frac{1}{2} N_z \cdot d_z + (n+1) \frac{1}{N_V} \cdot N_z \cdot d_z$$

($N_z \cdot d_z = \text{volume-height}$)

~~wenn top~~

new $\bullet r_{\max} = \frac{1}{2} \cdot N_x \cdot d_x$

\bullet wenn $\text{top} < 0$

$$\text{dann } \text{top-proj-virt} = \text{top} \cdot \frac{\text{dist-sd}}{|d_{\text{src}}| - r_{\max}}$$

$$\text{sonst } \text{top-proj-virt} = \text{top} \cdot \frac{\text{dist-sd}}{|d_{\text{src}}| + r_{\max}}$$

\bullet wenn $\text{bottom} < 0$

$$\text{dann } \text{bottom-proj-virt} = \text{bottom} \cdot \frac{\text{dist-sd}}{|d_{\text{src}}| + r_{\max}}$$

$$\text{sonst } \text{bottom-proj-virt} = \text{bottom} \cdot \frac{\text{dist-sd}}{|d_{\text{src}}| - r_{\max}}$$

$$\bullet \text{ top-proj-real} = 0 - \frac{N_V \cdot d_V}{2} - \Delta V + d_V/2$$

($\Delta V = \text{vert-offset-mm}$)

$$\bullet \text{ bottom-proj-real} = \text{top-proj-real} + N_V \cdot d_V - d_V$$

$$\bullet \text{ top-proj} = \begin{cases} 2. & \text{top-proj-real wenn } \text{top-proj-virt} < \text{top-proj-real} \\ 1. & \text{bottom-proj-real wenn } \text{top-proj-virt} > \text{bottom-proj-real} \\ 3. & \text{top-proj-virt wenn } \text{top-proj-virt} \text{ sonst} \end{cases}$$

$$\bullet \text{ bottom-proj} = \begin{cases} 1. & \text{top-proj-real wenn } \text{bottom-proj-virt} < \text{top-proj-real} \\ 2. & \text{bottom-proj-real wenn } \text{bottom-proj-virt} > \text{bottom-proj-real} \\ 3. & \text{bottom-proj-virt sonst} \end{cases}$$

-2-

~~start_row =~~

$$(\text{def_row} = \frac{v - \frac{dv}{2} - v_{\min}}{dv} = \frac{v - v_{\min}}{dv} - \frac{1}{2})$$

$$v_{\min} = -\frac{Nv \cdot dv}{2} - \Delta v$$

$$\bullet \text{ start_row} = \left\lfloor \frac{\text{top_proj} + \frac{Nv \cdot dv}{2} + \Delta v}{dv} - \frac{1}{2} \right\rfloor \quad \text{L J ... floor}$$

$$\bullet \text{ bottom_row} = \left\lceil \frac{\text{bottom_proj} + \frac{Nv \cdot dv}{2} + \Delta v}{dv} - \frac{1}{2} \right\rceil \quad \text{[] ... ceil}$$

Umrechnung Raumkoordinaten auf Reaktor in Pixelkoordinaten:

$$\tilde{i} = \frac{v + \frac{Nv \cdot dv}{2} + \Delta v}{dv} - \frac{1}{2}$$

$$\tilde{j} = \frac{h + \frac{Nh \cdot dh}{2} + \Delta h}{dh} - \frac{1}{2}$$
